Recognize and Respond to Anaphylaxis

For a suspected or active food allergy reaction

FOR ANY OF THE FOLLOWING SEVERE SYMPTOMS

- **LUNG:** Short of breath, wheezing, repetitive cough
- **HEART:** Pale, blue, faint, weak pulse, dizzy
- **THROAT:** Tight, hoarse, trouble breathing/swallowing
- **MOUTH:** Significant swelling of the tongue, lips
- **SKIN:** Many hives over body, widespread redness
- **GUT:** Repetitive vomiting, severe diarrhea
- **OTHER:** Feeling something bad is about to happen, anxiety, confusion

OR MORE THAN ONE MILD SYMPTOM

- **NOSE:** Itchy/runny nose, sneezing
- **MOUTH:** Itchy mouth
- **SKIN:** A few hives, mild itch
- **GUT:** Mild nausea/discomfort

1. **INJECT EPINEPHRINE IMMEDIATELY**
2. **Call 911**
   Request ambulance with epinephrine.

Consider Additional Meds
(After epinephrine):

- Antihistamine
- Inhaler (bronchodilator) if asthma

**Positioning**
Lay the person flat and raise legs. If breathing is difficult or they are vomiting, let them sit up or lie on their side.

**Next Steps**
- If symptoms do not improve, or symptoms return, more doses of epinephrine can be given about 5 minutes or more after the last dose.
- Transport to and remain in ER for at least 4 hours because symptoms may return.

Do not depend on antihistamines. When in doubt, give epinephrine and call 911.
